

UK INTERNET GOVERNANCE MEETING

Donor Handout

WHAT IS THE UK IGF?

The UK Internet Governance Forum (UK IGF) is the national IGF for the United Kingdom. IGFs are an initiative led by the United Nations for the discussion of public policy issues relating to the internet. A key distinguishing feature of IGFs is that they are based on the multi-stakeholder model – all sectors of society meet as equals to exchange ideas and discuss best practices. The purpose of IGF is to facilitate a common understanding of how to maximise the opportunities of the internet whilst mitigating the risks and challenges that the internet presents.

WHAT ARE THE OUTPUTS?

The UK IGF is not a decision-making body but it is influential as a forum for public policy discussion in the UK. The day is usually well attended by the UK government and provides an opportunity to create a UK consensus on critical policy issues related to the internet. Messages from the UK IGF are compiled into a report and carried to the Global UN IGF. Videos of the day are available on the website.

WHAT ARE THE AIMS AND OBJECTIVES?

The UK IGF facilitates multi-stakeholder dialogue to share expertise and best practice. Where possible, it aims to identify common ground. This enables the UK IGF to pull together a national UK perspective on internet related issues and promote this internationally. It is a forum for starting and facilitating discussion rather than finalising it.

WHO ORGANISES THE UK IGF?

The UK IGF is organised in a bottom-up manner. The content of the programme is initiated and shaped by all participating stakeholders and open for everyone.

The UK IGF has a steering committee and secretariat. The committee members can be found at ukigf.org.uk/committee and the secretariat is provided by Nominet, the UK's national domain name registry.

CALL FOR DONORS

We are seeking interest in donations of any value (up to £5,000) to contribute to the organising and running costs of the UK IGF.

If you are interested in contributing to the UK IGF, please contact info@ukigf.org.uk We are taking contributions from individuals and organisations.

CONTRIBUTORS TO THE UK IGF SECRETARIAT IN 2022

Organisation	 NOMINET	
Contributions (GDP)	£40,500	£1,500

FACTS AND FIGURES: UK IGF 2022

On 1 November 2022, 120 delegates from government, civil society, parliament, industry, the technical community, and academia met in person and virtually to discuss The Future of the Internet. The content was aligned to the three themes: Trust, Inclusion, and Data.

Our speakers continued to be diverse and representative of the whole of the UK, with 56% being female, 40% from outside London and the South East and 28% being BAME. This continues to be central in terms of how UK IGF is designed to ensure the discussions are truly relevant to the experiences of all UK digital citizens.

The event report and all presentations are available at <https://ukigf.org.uk/events/uk-igf-2022/>
